my wish it will make a study of this man, which certainly does present certain unusual features, and let you know the result. It is added, if you will call at my laboratory day after tomorrow, I may have something more news to tell you in person.

"It will interest you to know that we have all our six stores equipped with Burroughs Machines as well as one in our main office. Without them it would be next to impossible to handle the large volume of business we do and have 100 per cent accuracy."

(Signed) R. J. FRIZZLE.

What Mr. Frizzle Does You Can Do

(Read the appendix, page 2)

Some one or more of the many models of Burroughs Adding, Bookkeeping and Calculating Machines has a definite place in your business, both in respect to giving you more accurate information about the condition of that business and in the correction of errors. Each type and kind of Burroughs machine inevitably delivers profit to its owner.

The A B C of Business

The standard Burroughs line contains machines for Adding for Bookkeeping and for Calculating, among them a model which will fit into any business, large or small, and report its cost in an exceedingly short time.

Its branches office are maintained in more Canadian cities—St. John, N. B.; Halifax, N. S.; St. John's Nfld. (Quebec and Montreal, P. Q.; Ottawa, Toronto and Hamilton, Ont.; Winnipeg, Man.; Regina and Saskatoon, Sask.; Calgary and Edmonton, Alta.; Vancouver and Victoria, B. C.

Adding — Bookkeeping — Calculating Machines

What Can Be Done With an Adding Machine

By R. J. FRIZZLE, Post Office, Calgary, Alberta

Our Burroughs Machines are used on the counter in connection with a cash register to total up purchases as the customers pass out. They are also used in taking stock each month and for making out daily pass slips to be sent to the office in the main store.

In this store we use a Burroughs to balance the cash book, reconcile bank accounts, check invoices, take stock in the main store monthly, add up stock sheets, total delivery slips, showing cost and selling price of goods delivered from warehouse and make out in total a monthly statement for each of our stores. In addition to that we add up journal entries, and take off a monthly trial balance.

"We operate our stores by modern, up-to-

date methods but even if we should go back to the old way of doing it, we would not attempt to do so without a Burroughs. We certainly profit by using the machines to total items in cash sales. I even go so far as to tell employees not to add even two items mentally because I have found that a fellow may be an excellent salesman and yet very poor at addition.

Comparison of our physical inventory with our book records shows whether customers are getting goods they do not pay for. You can see what a valuable thing it is to have a check on this. It would be impossible without mechanical figuring. In addition to all the other benefits we get, our machine undoubtedly saves us the cost of an extra clerk in the office.
